

spring

summer

Science - seasonal change.

autumn

winter

The year is split into 4 seasons.

The weather changes throughout the seasons.

Autumn starts on the 22nd of September until Monday 21st of December.

Month	Sept	Oct	Nov	Dec	Jan	Feb	Mar	April	May	June	July	Aug
Hours of sunlight	13	11	9	8	8	10	12	14	15	16	16	14

In autumn, the weather is usually a bit chilly. The temperature around the UK drops, especially in the evening and at night. There is usually more rain than during the summer and it can be foggy

In autumn, the evenings begin to get darker earlier. You might also notice that the mornings begin to get lighter later than in the summer months. It may still be dark when you wake up!

Some of the signs of autumn are:

autumn

The autumn months are September, October and November
